### CHEEZO'S TECHNOLOGY SAFETY TIPS

1. Our most important message for kids communicating with technology (computer, smart phone, tablet, iPad, iPod or gaming device) is to only talk with people they know face-to-face.
2. All account settings should be set to private so only approved friends can view what you are posting.
3. Playing online games we have a simple rule: "Play the Game, Don't Give Out Your Name." Talk about the game, but not about you.
4. If someone or something bothers you while using technology, tell your mom, dad, or the adult in charge.
5. Location Services should be off on your camera settings, messaging and social networking sites.
