

On-Site Restriction Form Letter "R"

Date Form Prepared: December 13, 2016

NOTICE: This form is not to be altered and is to be completed prior to a rough framing inspection.

To Whom It May Concern:

I, _____, am a qualified indoor air quality specialist with experience in radon mitigation systems and building science. Based upon my knowledge, sound principles and industry practices, I state to Jefferson County to the best of my knowledge the following facts:

1. A radon mitigation system for each residential structure was required for this subdivision. The radon mitigation system is intended to reduce the indoor radon levels.

A visual inspection of the radon mitigation system for Lot _____, Block _____, of the _____ subdivision, has been conducted under project number _____ by the firm of _____ on _____ (date).

The radon mitigation system that was installed is a _____ (passive or active) system.

2. The attached site plan depicts the approximate location and details (material, size, etc) of the radon collection pipes, radon vent pipes, joints and electrical circuit for the existing or future fan connection. If applicable, the details of the installation of the control pipe from the sump pit and details to seal the sump pit lid are included on the plans.

This plan for the building to be constructed on the above referenced lot has been reviewed and/or prepared by me. I have verified that said plan satisfies or exceeds the language above.
