

## Proposed Policies Coordination and Outreach

Goal	Important	Strike	Consequences	Modifications/Comments
Develop and maintain partnerships and joint outreach programs with water providers.				
<b>Policy</b>				
1. The County should engage with water providers to share issues of mutual concern on a periodic basis and work collaboratively to address long-term water supply concerns.				
2. Create a list of water providers by Area Plan.				
3. Encourage continued collection and analysis of data for the purpose of better determining the extent and availability of groundwater.				
4. Work with the CSU Cooperative extension to create a Xeriscape program to educate residents about the benefits and proper maintenance of low water use landscapes.				
5. Coordinate with water providers on water conservation education for residents and businesses about ways to conserve water in their homes and businesses.				
6. Landscaping regulation updates should be complemented by an education program for residents, developers and builders to maximize the potential of water-conserving landscape design.				
7. Encourage special districts to include water conservation measures in their utility master plans.				
8. Support implementation of water provider conservation projects.				
9. Support appropriate efforts by water providers to incorporate drought conditions in their supply and demand forecasts in providing future and existing water supplies.
