

- Is the focus water quality or quantity?
- What does “reuse” mean?
- Conifer is extremely vulnerable to water shortages due to development because we don’t have concrete data on water levels of the aquifer.
- Conservation won’t do enough up here. Does County have a plan to revisit research on water availability? This is what is most important to Conifer.
- Do WR produces yearly report on water levels in each “district”. Is it possible to create a 10th district for mountains?
- Better measurement group for water tables.
