

- Looking at regulation changes to gray water & stormwater collection?
- Looking at policies
- Creation of more storage capacity would be important
 - Have some, should more be added? Yes!
- How does this relate to state regulations for wells?
 - Consulting with state
 - CGS Grant for WAA Update
- Development must demonstrate adequate water
 - They don't really show anything concrete--- Is it possible to show more concrete data?
 - WAA is the analysis for physical water availability.
 - Looks at how much water is in a basin, precipitation/ recharge, how many wells in area, evaporation, to determine if any physical water is available
- Is water quality studied by the EPA?
 - No, but new subdivisions must test quality and quantity
