Presentations:

- Paul Anslow gave an update on the airport budget, operations and fuel trends and recent airport projects. Operations and fuel sales continue to recover from the impact of COVID-19 restrictions in the spring. Mr. Anslow also reviewed a number of airport infrastructure projects and initiatives that were completed over the past two years.
- Randy Holliday summarized that the initiatives undertaken by the airport were in support of the variety of uses that make up a successful airport: general aviation, business aviation, and commercial aviation and manufacturing.

Public Comments:

- Stan Sprecht mentioned that the GA community was nervous that the visioning and master planning discussed by the Airport Advisory Board did not consider general aviation. General aviation is a recreational, mental state. Please keep that in consideration when discussing economics.
