

Use jMap to Determine a Location's Water and Sanitation or Metropolitan District

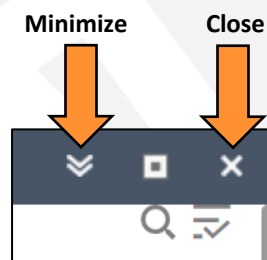

- Access [jMap](#) and accept the disclaimer.
- At the upper right-hand corner, click **Layer List**. 
- Within the **Layer List** drop-down menu, scroll down to and check the box next to **Special-District**.
- Click the arrow to the left of the checkbox to expand the **Special-District** list.

- Scroll down and click to check the boxes next to **Metropolitan District**, **Sanitation District**, **Water District**, and / or **Water and Sanitation District**.

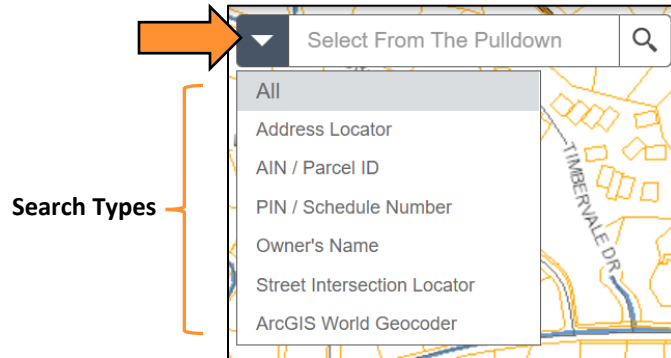

- To minimize or close the **Layer List**, click the double down-arrows (minimize) or X (close) buttons at the upper right-hand corner.

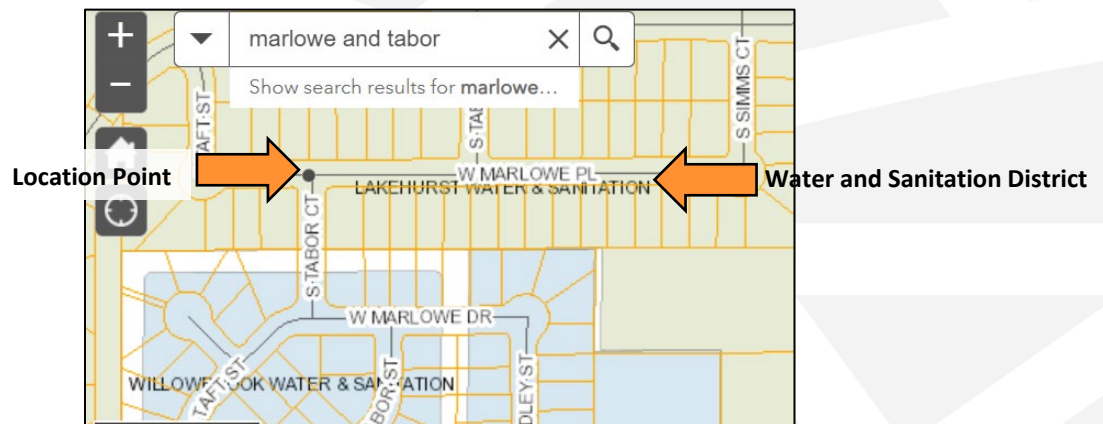

- Use the search bar at the upper left-hand corner of the screen to find a location on the map. Click the arrow to the left of the search box to open a pulldown menu and select type of search.

Type the location in the search box and select it from a drop-down list of locations that appears, click the magnifying glass to the right of the search bar, or press the enter key.

- A point will appear on the map for the selected location.
- Note the color of the area surrounding the location point. The name of the location's associated metropolitan, or water and sanitation district (if it has one) will also be within the same colored area.

The above example shows the location point at W. Marlowe Place and S. Tabor Court is within Lakehurst Water and Sanitation District.
