

South Kipling Parkway Improvement Project at West Bowles Avenue

Aug. 1, 2022

PROJECT UPDATE

In July, crews shifted traffic in the area to complete the next phase of construction. This traffic shift closed the right-turn pockets on the west side of the intersection. Crews completed median removals on the west side of the intersection, storm pipe installation, grading and concrete activities, curb and gutter installation, and asphalt patching.

PROJECT IMPACTS - AUGUST

In August, crews will continue the following construction activities:

- Construction and traffic signal installation on the west side of the intersection
- Earthwork, sidewalk, ADA ramp and pedestrian island installation
- Storm pipe installation
- Grading and concrete activities
- Asphalt paving

TRAVEL IMPACTS

- Closures of the right-turn pockets on the west side of the intersection - Use the right thru lane to turn right onto West Bowles Avenue; Two thru lanes are open.
- Right lane closures on eastbound and westbound West Bowles Avenue - Two thru lanes are open instead of three lanes to allow for a safer work zone.
- Right turn access is maintained in the area except for the turning lanes into and out of the Antique Mall on southbound South Kipling Parkway - business access on southbound South Kipling Parkway will be reopened by the end of August.
- Watch for daytime lane closures Monday through Friday, from 8:30 a.m. to 3:30 p.m. Expect 35 mph speed limits and narrower lanes.

PROJECT SUMMARY

The South Kipling Parkway Improvement Project at West Bowles Avenue is an intersection improvement project that began in May 2022. The project limits extend from just north of West Fair Avenue to just north of West Bowles Avenue with improvements limited to the intersection only.

By project completion in fall 2022, the project team will add a through lane in each direction on South Kipling Parkway, install new traffic signals, optimize island space for pedestrians and improve ADA curb ramps.
