

## South Kipling Parkway Improvement Project at West Bowles Avenue

**OCTOBER 2022**

### PROJECT UPDATE

#### Traffic Impacts

Through the end of October, crews will complete the following construction activities on the South Kipling Parkway and West Bowles Avenue Project.

- Finishing items including landscaping, utility work, etc.
- Final striping operations on Oct. 27 and 28, from 8:30 a.m. to 3:30 p.m. Watch for temporary lane closures during this work.

#### Project Completion

By November 2022, construction on the South Kipling Parkway Improvement Project at West Bowles Avenue will be nearly complete with some close out items remaining. All work that causes major impacts will be completed, and traffic will be restored to its new, final configuration.

When construction comes to a close, the general public can enjoy an additional through lane in each direction on South Kipling Parkway, updated traffic signals, increased island space for pedestrian safety and improved ADA-compliant curb ramps.

SEMA Construction thanks you for your patience as our project team completed work on this intersection!

### PROJECT SUMMARY

The South Kipling Parkway Improvement Project at West Bowles Avenue is an intersection improvement project that began in May 2022. The project limits extend from just north of West Fair Avenue to just north of West Bowles Avenue with improvements limited to the intersection only.

By project completion in fall 2022, the project team will add a through lane in each direction on South Kipling Parkway, install new traffic signals, optimize island space for pedestrians and improve ADA curb ramps.
