<td>Death Investigations by Law Enforcement Agency</td>
</tr>
</tbody>
</table>
The Office of the Jefferson County Coroner is a creation of the Colorado Constitution and the Colorado Revised Statutes §30-10-606 which requires that the coroner’s office investigate all deaths in Jefferson County that fall under the following circumstances:

- If the death is or may be unnatural as a result of external influences, violence, or injury;
- Due to the influence of or the result of intoxication by alcohol, drugs, or poison;
- As a result of an accident, including at the workplace;
- When the death of an infant or child is unexpected or unexplained;
- When no physician is in attendance or when, though in attendance, the physician is unable to certify the cause of death;
- From a death that occurs within twenty-four hours of admission to a hospital;
- From a disease which may be hazardous or contagious or which may constitute a threat to the health of the general public;
- If the death occurs from the action of a peace officer or while in the custody of law enforcement officials or while incarcerated in a public institution;
- When the death was sudden and happened to a person who was in apparent good health;
- When a body is unidentifiable, decomposed, charred, or skeletonized; or
- Circumstances that the coroner otherwise determines may warrant further inquiry to determine cause and manner of death or further law enforcement investigation.
### Additional responsibilities of the Coroner’s Office staff include the following:

The jurisdictional boundaries of the Jefferson County Coroner’s Office lie within the geographical boundaries of Jefferson County.

Jefferson County’s slogan is the “Gateway to the Rocky Mountains” and the county seat is Golden.

Jefferson County consists of 773 square miles and borders as many as 10 other counties.

Jefferson County is included in the Denver Metropolitan Area and is located along the Front Range of the Rocky Mountains.

The incorporated cities within Jefferson County consist of Arvada, Edgewater, Golden, Lakewood, Wheat Ridge, and a part of Westminster. The coroner’s office also conducts investigations alongside town police in Morrison, Mountain View, Bow Mar, Lakeside, and part of Superior.

Unincorporated Jefferson County includes the communities of Buffalo Creek, Conifer, Foxton, Idledale, Pine, Pine Junction, and part of Littleton.
The Jefferson County Coroner’s Office receives its funding entirely from the General Fund.

In 2021, the adopted budget was $2,468,000 which accounted for a 9.4% decrease from 2020. The total expenditures at the end of 2021 totaled $2,468,000.

The Jefferson County Coroner’s Office’s 2021 budget accounted for 1.1% of the total funds allocated by the General Fund ($224 million) and 0.4% of the total Jefferson County annual budget of $622 million.
OVERVIEW

The Jefferson County Coroner’s Office retained jurisdiction over 1533 deaths in 2021.

An additional 3,801 deaths were reported in 2021, but jurisdiction was not taken. These deaths consisted of hospice deaths and inpatient hospital deaths that did not have any non-natural circumstances.

The average yearly increase in deaths in Jefferson County between 2010 and 2021 was 4.09%.

The average yearly increase in population estimations in Jefferson County between 2010 and 2020 was 0.94%.

A death certificate is required to be filed with the Colorado Department of Public Health & Environment (CDPHE) for each death that occurs in Jefferson County.

In 2021 5,336 death certificates were filed with CDPHE indicating the death occurred in Jefferson County.

*Population estimates for 2021 were not available at the time of this report.

- 2021: 5336
One of the primary responsibilities of the Coroner’s office is to determine the cause and manner of death.

The CAUSE OF DEATH is the condition (disease or injury) that created the sequence of events that resulted in the death.

• Examples of cause of death may include: “Atherosclerotic cardiovascular disease”, “Blunt force trauma”, “Gunshot wound”, etc.

The MANNER OF DEATH is based on the circumstances surrounding the cause of death.

There are five manners of death:

• Natural, Accident, Suicide, Homicide*, Undetermined

*It should be noted that the medicolegal determination of a manner of death of homicide does not imply criminal intent.
2021
JCCO CASES BY MONTH
WHERE JURISDICTION WAS ASSUMED
(TOTAL: 1533)
2021 DEATHS BY MANNER OF DEATH

- Natural: 844
- Accident (Non-Traffic): 414
- Suicide: 157
- Accident (Traffic Related): 64
- Undetermined: 23
- Homicide: 31
The Jefferson County Coroner’s Office responded to 1,151 death scenes which accounted for 75% of all of the deaths reported to the coroner’s office in 2021 in which jurisdiction was assumed.

A scene response is most often made at the request of a law enforcement agency; however, the coroner’s office also responds to calls at other locations such as hospitals and care centers as deemed necessary when these deaths are reported by facility staff.

During a scene investigation involving a law enforcement agency, the law enforcement agency has jurisdiction over the scene while the coroner’s office has jurisdiction over the body and items directly relating to the death. Law enforcement has the responsibility to determine if a crime has occurred and the coroner’s office is responsible for determining the cause and manner of death. It is essential that both agencies work collaboratively to reach both agencies’ determinations.

At the conclusion of a scene investigation, the coroner investigator makes a determination whether to have the body of the decedent transported to the coroner’s office for further examination/investigation, positive identification and/or notification of next of kin or to release the body directly from the scene.

The coroner’s office may transport a body to the coroner’s office as a courtesy hold for the next-of-kin while a mortuary selection is being made.

(TOTAL: 1151)
2021 SCENE RESPONSES BY MANNER OF DEATH

*ONE SCENE RESPONSE WAS FOR NON-FORENSICALLY SIGNIFICANT HUMAN REMAINS*
AUTOPSIES

Of the 1533 cases the Jefferson County Coroner’s Office retained jurisdiction in 2021, 505 or 32.9% of the cases required an autopsy to aid in the determination of the cause and manner of death. After the completion of the autopsy examination toxicology and/or histology studies are also typically performed. The forensic pathologist may forgo these additional studies at their discretion when a definitive anatomical cause of death is determined during the examination.

Autopsies are performed in deaths where there is a lack of an established medical history, most suicides, most traffic incidents, in situations where criminal action is possible, homicides, and in any suspected poisoning or overdose.

If an individual is hospitalized following a traumatic event and the medical record thoroughly and clearly documents the injuries sustained, an autopsy is typically not necessary.

All of the autopsies performed for the Jefferson County Coroner’s Office are completed by exceptionally talented and knowledgeable board-certified forensic pathologists.

NATURAL DEATHS

Natural deaths are deaths that occur due to a natural disease and/or aging process. The majority of deaths reported to the coroner’s office are deaths due to natural causes.

The data listed in this report for natural deaths only reflect the cases in which jurisdiction was assumed.

In 2021 JCCO investigated 844 cases that were determined to be natural.

There are an additional 3,801 deaths that were reported as hospice, inpatient hospital, or care center deaths that JCCO declined jurisdiction and the death certificate was signed by the decedent’s physician.

For statistical purposes, the natural deaths reported to the Jefferson County Coroner’s Office are broken down into deaths as follows:

- Cardiac disease
- Pulmonary disease
- Infectious disease
- Cerebrovascular disease
- Cancer
- Endocrine
- Chronic Alcohol Abuse
- Other

Natural deaths accounted for 55% of the total JCCO caseload for 2021.

2021 NATURAL DEATHS BY AGE AND SEX
ACCIDENTAL DEATHS (NON-TRAFFIC RELATED)

Accidental deaths are deaths that result from injury or poisoning that occurred without the intent for harm or to cause death.

Accidental overdose or drug toxicity deaths account for a large portion of the accidental deaths investigated by the coroner’s office.

Non-traffic accidental deaths accounted for 27% of the total JCCO caseload for 2021.

The majority of accidental deaths investigated by the coroner’s office are due to injuries such as hip fractures or intracranial hemorrhages due to mechanical falls in the elderly population.

In 2021 JCCO investigated 414 deaths that were determined to be accidental and did not involve a traffic incident.

Bar chart showing the distribution of accidental deaths by type with Drug Intoxication/Toxicity being the most common cause.
Traffic related accidental deaths include deaths in which the deceased was a driver or passenger of a motor vehicle, operator or a passenger of a motorcycle, a pedestrian, scooter rider, or bicyclist who died as a result of traumatic injuries sustained in a motor vehicle incident.

28.1% of the individuals who died in this category were restrained or helmeted at the time of the incident.

43.8% of the individuals who died in this category were unrestrained or unhelmeted at the time of the incident.

The remaining 28.1% of the individuals were either pedestrians or their restraint status was unknown.

In 2021 JCCO investigated 64 deaths that were determined to be accidental and involved a traffic incident.

Traffic related accidental deaths accounted for 3% of the total JCCO caseload for 2021.

SUICIDE DEATHS

SUICIDE DEATHS ARE CLASSIFIED AS DEATHS THAT OCCUR AS A RESULT OF SELF-INFLICTED INJURY OR HARM.

IN 2021, 81% OF THE DEATHS WERE THOSE OF MALES. THIS FIGURE IS CONSISTENT WITH NATIONWIDE FIGURES.

THE MOST COMMON METHOD OF SUICIDE IN 2021 WAS FIREARM RELATED 52% FOLLOWED BY ASPHYXIATION, MOST COMMONLY DUE TO HANGING 30.5%.

ONLY 3.8% OF THE SUICIDE DEATHS OCCURRED IN THE JUVENILE POPULATION.

IN 2021 JCCO INVESTIGATED 157 DEATHS THAT WERE DETERMINED TO BE SUICIDE.

SUICIDE DEATHS ACCOUNTED FOR 10.2% OF THE TOTAL JCCO CASELOAD FOR 2021.

HOMICIDE DEATHS

Homicide deaths are those deaths occurring as a result of the acts of another person.

For purposes of classifying the manner of death as a homicide, there is no implied criminal intent.

In 2021 JCCO investigated 31 deaths that were determined to be homicide.

Homicide deaths accounted for 2% of the total JCCO caseload for 2021.

- **Incised Wound**: 6 (6 Male, 1 Female)
UNDETERMINED DEATHS

Deaths classified as undetermined are deaths in which, after a thorough investigation and consideration of all information available, one manner of death is no more compelling than another manner of death.

In some instances, the cause of death is apparent; however, the circumstances leading up to the death are unable to be determined based on the evidence. An example of this is in a situation of drug intoxication or overdose in which the investigation was unable to discern whether the intoxication was intentional or accidental.

In 2021 JCCO investigated 23 deaths in which the manner of death was unable to be determined.

Undetermined deaths accounted for 1.5% of the total JCCO caseload for 2021.

In 2021, JCCO investigated 191 deaths that were related to drug intoxication.
• 17 of the deaths were suicides (8.9%)
• 173 of the deaths were accidents (90.6%)
• 1 of the deaths was undetermined (0.5%)

OF THE 191 TOTAL DRUG RELATED DEATHS IN 2021

Heroin related deaths accounted for 2 (1%) of the deaths.

Methamphetamine/Amphetamine deaths accounted for 20 (10.5%) of the deaths.

Mixed drug or combined drug intoxication/toxicity deaths accounted for 128 (67%) of the deaths.
• Mixed drug or combined drug intoxication deaths indicate the presence and relevance of more than one (1) substance that contributed to the death and includes alcohol, illicit drugs, prescription medications, and over-the-counter medications.

Other drug related deaths accounted for 4 (2.1%) of the deaths.
• The category of ‘Other’ reflects singular substances that caused the death that include, but are not limited to, substances such as amitriptyline, diphenhydramine, cocaine, and methadone.

Other opiate related deaths accounted for 7 (3.7%) of the deaths.
• ‘Other Opiate’ reflects deaths due to, but not limited to, oxycodone, hydrocodone, and/or unspecified opiate intoxication.
