

Stakeholder Involvement Process

The Jefferson County Transportation and Engineering Division actively solicits feedback from stakeholders affected by Capital Improvement Projects such as roadway widening, drainage improvements, and construction of sidewalks and bicycle facilities.

Stakeholders may include:

- Cyclists
- Residents and Homeowners Associations
- Businesses
- Pedestrians
- Equestrian groups
- Daily commuters
- Freight Operators
- Real Estate Developers
- Environmental and Wildlife Groups
- Special Districts

Opportunities are available to individuals or groups that wish to review proposed projects and provide input on their design.

<p>Conceptual Design</p>	<p>T&E typically completes 5% of designs in-house. By request, T&E will provide interested stakeholders an overview of design standards and requirements and review the design and layouts.</p> <p>Stakeholder involvement during this phase will consist of feedback on design.</p>
<p>30% Design Review</p>	<p>T&E typically solicits consultants beyond 5% design. T&E will schedule a public meeting around the 30% design phase to provide an overview of the design.</p> <p>Stakeholders involvement during this phase will consist of feedback on design.</p>
<p>Post-30% Design Updates</p>	<p>After the 30% design review meeting, T&E will no longer solicit feedback on the design. Updates on schedule and final design will be posted on this website as they become available.</p>

To become involved with the Stakeholder Engagement Process and receive information at each stage of review and comment for a project, please email Transportation Planner, Yelena Onnen at yonnen@jeffco.us. Include the following information in the email:

- your contact information
- the projects that interest you
- what group you represent or interest you have in the project

Thank you.
