

This report was created on May 10, 2021.

ELIGIBILITY

In order for a county to open 5 star businesses at a less restrictive level, a county must have:

- A one-week incidence in the appropriate dial level (**Orange**: 500 per 100,000 or lower, **Yellow**: 300 or lower, **Blue**: 100 or lower) for all of the past 7 days*
- A one-week percent positivity in the appropriate dial level (**Orange**: 10% or lower, **Yellow**: 7.5% or lower, **Blue**: 5% or lower) for all of the past 7 days
- Under 90% of regional ICU beds in use, and days of stable or declining hospitalizations in the past two weeks in the appropriate dial level (**Orange**: 7 or fewer days, **Yellow**: 8 or more days, **Blue**: 12 or more days).

INCIDENCE

Jefferson county's one-week cumulative incidence rate from May. 3 through May. 9 is 131.5 per 100,000. 0 days out of the last 7 are 100 per 100,000 or lower. **(Fail)**

Incidence excludes outbreak-associated cases among residents of congregate facilities (see "One-Week Cumulative Incidence" from covid19.colorado.gov/covid-19-dial-dashboard).

PERCENT POSITIVITY

Jefferson county's one-week positivity from May. 3 through May. 9 is 4.9%. 1 day out of the last 7 is 5% or lower. **(Fail)**

Positivity data only includes tests submitted to the state electronically (see "One-Week Average Positivity" from covid19.colorado.gov/covid-19-dial-dashboard).

HOSPITALIZATIONS

75% of ICU beds in the Foothills region are currently in use. **(Pass)** There have been 4 days of declining or stable new hospital admissions of Jefferson county residents in the past two weeks. **(Fail)**

For more detail about the Regional Emergency Medical & Trauma Services Advisory Council (RETAC) regions and hospital capacity data, see the 'Regional Level' section on the 'Hospital Data' page from covid19.colorado.gov/data. Trends in hospitalizations is based on the county of residence of people admitted to the hospital (see "Decreasing or Stable Hospitalizations" from covid19.colorado.gov/covid-19-dial-dashboard).
